TECHNOLOGIES & SKILLS

Programming & Data

Python, Pandas, NumPy

Backend & APIs

FastAPI, REST APIs

AI / NLP

AI fundamentals, LLM API integration, RAG fundamentals, TensorFlow

Databases

SQLite, PostgreSQL

Cloud

AWS, Azure fundamentals

LANGUAGES

English	**B2**
Polish	**B2**
Ukrainian	**Native**

PROFILE

AI-focused developer with good knowledge of Python, backend development, and REST APIs. I enjoy turning AI ideas into real applications, from working with LLMs to building recommendation systems. I am always curious, eager to learn, and motivated to create useful solutions that solve real problems.

PROJECT EXPERIENCE

Personalized Content Recommendation System

Python | NLP | Text Embeddings | Vector Similarity

- Designed a movie and video recommendation system with user-controlled content diversification.
- Explored vector representations to compare the semantic similarity of content.
- Designed recommendation settings that balance familiar topics with new discoveries.

Note: Currently in development; console-based prototype available.
GitHub: https://github.com/HavermAn2/rec_system

Musician Portfolio Website

Python | FastAPI | SQLite | React | Telegram Bot API

- Created a musician's website with a music player, articles, services, and a booking form.
- Built the backend and database for content management and booking requests.
- Integrated a Telegram bot to manage music, articles, photos, and services.
